

HCC awarded Rs 167.67cr water supply project in Gujarat

Mumbai, October 20, 2009: HCC, India's leading engineering and infrastructure Development Company, has been awarded Rs 167.67 crore contract for Water Supply Scheme from Kesaria to Sonaria (NC-25) by Gujarat Water Infrastructure Ltd. It is an EPC contract for pumped water supply scheme and will be completed in 18 months.

In this water supply scheme the water will be drawn from Narmada Main Canal at Kadiali and will be carried through pipeline to Sonaria near Veeraval. The project aims at transmitting 124.42 MLD of drinking water drawn from Kesaria to Sonaria through 62.28 Kms long Mild Steel pipeline from where the enroute rural areas with over 100 villages in Rajula & Una Taluka of Amreli and Junagadh district will be served.

HCC will be responsible for Engineering, Procurement and Construction of all items including civil and associated infrastructure works comprising of supply, installation, testing and commissioning of all electromechanical plant & machinery including pumping station. HCC will construct two reservoirs – one at Kesaria along with pumping station and second at Veeraval and a 62.28 km pipeline connecting these two reservoirs.

HCC's expertise in water and irrigation sector spans over construction of dams, barrages, canals, pipelines and water treatment plants. The company has built 22 dams in almost all parts of India of which 6 dams were built for irrigation projects. It has made significant contribution in water management which include the largest water treatment plant in Asia built for BMC in Mumbai, the largest Aqueduct in the world - the Gomti Aqueduct and the entire water conveyance system for the city of Thirupur including the water treatment plant.

About HCC:

HCC is a leading engineering, construction and infrastructure development company with a rich heritage of experience. The company specializes in large-scale infrastructure development deploying new age construction technologies. The Company has managed and executed several technically complex and high value projects across segments like transportation, hydro & nuclear power generation, marine, irrigation & water supply projects as well as integrated urban development and management.
